Sequence 1, Application US/08232233

Patent No. 555532

Patent No. 555525

PATENT NO FUNDATION:

TITLE OF INVENTION: STRUCTURES BASED ON CHROMOPHORE-
TITLE OF INVENTION: CONTAINING POLYNUCLEOTIDES AND FLUOROPHORE-
TITLE OF INVENTION: CONTAINING POLYNUCLEOTIDES AND METHODS OF THEIR USE
NUMBER OF SEQUENCES: 11

CORRESPONDENCE ADDESS:

ADDRESSE: Lyon & Lyon
STREET: 611 West Sixth Street

COTTY: Los Angeles

STATE: COLTY: Los Angeles

STATE: CUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ; LOCATION: 10

Patent No. 6109776
REMERAL INFORMATION:
APPLICANT: Gene Logic, Inc.
TITLE OF INVENTION: Method and System for Computationally Identifying
TITLE OF INVENTION: Clusters Within a Set of Sequences
FILE REPRENCE 7700.1002
CURRENT APPLICATION NUMBER: US/09/063,450
CURRENT FILING DATE: 1998-04-21
NUMBER OF SEQ ID NOS: 38
SOFTWARE: PatentIn Ver. 2.1
SEQ ID NO 33
LENGTH: 10

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 17, Application US/09927886

Patent No. US20020103152A1

GENERAL INPORMATION:

APPLICANT: Kay, Mark A.

APPLICANT: Yant, Stephen

TITLE OF INVENTION: Methods of In Vivo Gene Transfer Using a TITLE OF INVENTION: Methods of In Vivo Gene Transfer Using a TITLE OF INVENTION: Methods of In Vivo Gene Transfer Using a TITLE OF INVENTION: Sleeping Beauty Transposon System

TURENT PAPLICATION NUMBER: US/09/927,886

CURRENT APPLICATION NUMBER: 00/162,279

PRIOR FILING DATE: 1999-10-28

PRIOR FILING DATE: 1999-11-17

NUMBER OF SEQ ID NOS: 19

NUMBER OF SEQ ID NOS: 19

Sequence 6, Application US/09535851A

Patent No. 6528636
GENERAL INFORMATION:
APPLICANT: Battelle Memorial Institute
APPLICANT: Battelle Memorial Institute
TITLE OF INVENTION: Producing Fungus Rhizopus Oryzae and a Method of Expressing a Ger
TITLE OF INVENTION: Producing Fungus Rhizopus Oryzae and a Method of Expressing a Ger
TITLE OF INVENTION: In Fungal Species
FILE REFERENCE: E-1891B
CURRENT PAPLICATION NUMBER: US/09/535,851A
CURRENT PILING DATE: 2000-03-27
NUMBER OF SEQ ID NOS: 9
SOFTWARE: Patentin version 3.1
SEQ ID NO 6
LENGTH: 33
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö

US-09-313-294A-26
Sequence 26, Application US/09313294A
Feet No. 6476212
GENERAL INFORMATION:
APPLICANT: Lagudi, Raghunath V.
APPLICANT: Ito, Laura Y.
TITLE OF INVENTION: POLYNUCLEOTIDES AND POLYPEPTIDES DERIVED FROM CORN EAR
FILLE REFERENCE: PL-0017 US
FILLE REFERENCE: PL-0017 US
CURRENT APPLICATION NUMBER: US/09/313,294A
NUMBER OF SEQ ID NOS: 7600
                                                                                                                                                                                                                 WS-09-513-999C-34984

Sequence 34984, Application US/09513999C

Patent No. 678361

APPLICANT: Dunmas Milne Edwards, J.B.

APPLICANT: Duclert, A.

APPLICANT: Glordano, J.Y.

TILLE OF INVENTION: Expressed Sequence Tags and Encoded Human Proteins.

Patent No. 678361

FILE REFERENCE: 59.US2.REG

CURRENT APPLICATION NUMBER: US/09/513,999C

CURRENT FILING DATE: 2000-02-24

PRIOR APPLICATION NUMBER: US 60/122,487

PRIOR APPLICATION NUMBER: 1999-02-26

NUMBER OF SEQ ID NOS: 36681

Publication No. US20040162679A1
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Li, Linhend
TITLE OF INVENTION: Method for Predicting Gene Potential and Cell Commitment
TITLE OF INVENTION: Models: US/10/430,201
CURRENT APPLICATION NUMBER: US/10/430,201
CURRENT PILING DATE: 2003-05-05
